

The coming revolution in Mineral Intelligence Capacity Analysis

.....

Primary and secondary Raw Material are fundamental to Europe's economy and growth. The MICA project will identify raw material information that respond to stakeholder needs.

MICA Mineral Intelligence Capacity Analysis

Objectives:

-> Identification and definition of stakeholder groups and their Raw Material Intelligence requirements
-> Development of the EURMKB integrating information on data and methods/tools with user interface capable of answering stakeholder questions
-> Link the derived intelligence to the EURMKB developed by the Minerals4EU project.

Impacts:

-> Help decision makers to better navigate through the Mineral Raw Material Domain. MICA will be providing information related to mineral intelligence methods, tools and data organized, quality controlled and available in a single place
 -> Offer a framework for the recommendation of Research & Innovation priorities
 -> Contribute to evidence-based policy and appropriate, cost-effective management, planning and adaptation decisions by the public sector, businesses, industry and society
 -> Improve conditions for sustainable access and supply of raw material in the EU
 -> Increase the competitiveness of the EU industry and promote the supply of minerals from EU sources.
