

PRESENTATION WP2: NEEDS

WP2 - Needs: identification of stakeholders, collection and mapping of stakes

Lorenz Erdmann
Kick-Off
3 February 2016

Work package number ⁹	WP2	Lead beneficiary ¹⁰	2 - Fraunhofer
Work package title	Needs: Stakeholder identification, appraisal and mapping of stakeholder requirements		
Start month	1	End month	14

Participation per Partner

Partner number and short name	WP2 effort
1 - GEUS	1.00
2 - Fraunhofer	10.00
3 - NERC	1.00
4 - UL-CML	2.00
5 - Minpol	1.50
6 - BRGM	1.00
7 - EGS	2.00
12 - EFG	3.00
13 - NTNU	1.00
Total	22.50

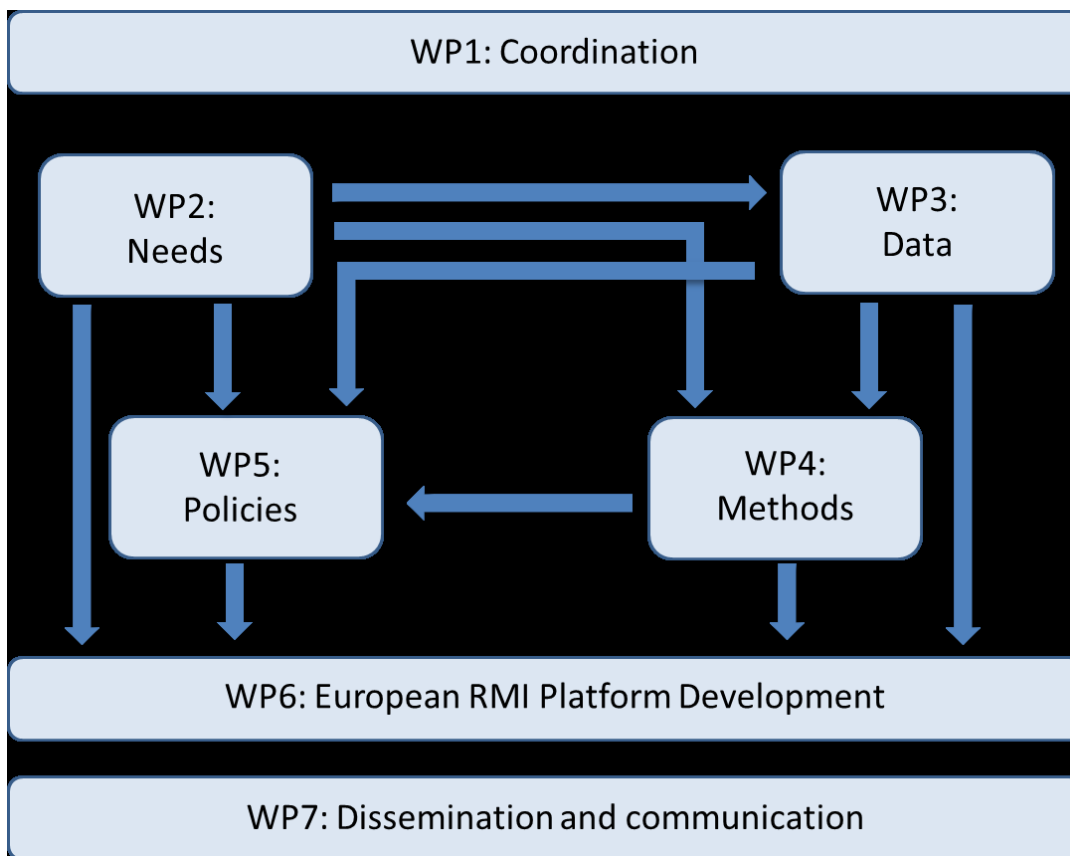

4 Third parties: MFGI, LNEG, PGI, SGU

provide a synopsis of stakeholder needs in Raw Material Intelligence (RMI) and – more concretely – of requirements to the envisaged RMI capacity. It aims at

- a comprehensive and differentiated inventory of relevant stakeholders, and
- an exploration of stakes (interests/questions) in RMI and how these are met at the moment.

The main purpose of WP2 is to inform WP3-WP7 about stakeholder requirements.

	Duration	Outcome
T2.1: Inception of stakeholder landscape & hypothesis on requirements	M1-M4	Milestone M1
T2.2: Systematic identification & classification of stakeholders	M1-M8	Deliverable D2.1
T2.3: Identification and mapping of stakeholders' RMI needs & requirements	M3-M14	Deliverable D2.2

⇒ WP2 linked to all other WPs: **partners involved** to ensure that stakeholder analysis makes sense for all other WPs

⇒ The **demand** to deliver stakeholder needs **moved** ever more **to the beginning** of the project

TIME PLAN FOR WP2

- The inception workshop will be informed
 - i) by an inventory of stakeholders in RMI compiled from past projects and
 - ii) by WP leader briefs on supposed stakeholder questions.
- These two strands will be mapped, discussed and matched to one another in a half-day internal workshop after the Kick-Off.
- An inception paper will be prepared that depicts
 - i) shared key requirements to the RMI capacity and
 - ii) refined directions for the systematic search.

T2.2.1: Stakeholder list - expand the list, identify subgroups, organisations & persons (*involved*):

- EC level: analyse past tenders (who issued & who answered) – ID advisors & questions; trace stakeholders of EU mineral policy, e.g. within consultations, ID decision makers & initiative aims;
- EU member-state level: classify member states to select representative countries; analogue to above;
- Industry: approach industry associations and chambers;
- Expert communities and other interest groups: analyse scientific conferences and positioning papers respectively.
- Open call to raise stakes via the MICA website (WP7).

T2.2.2: Stakeholder analysis - involved, affected & dormant.

- WP2 participants will hold brainstorming sessions (*affected*)
- Foresight studies will be analysed (*dormant*)

TASK 2.3 COLLECTION AND MAPPING OF STAKES

T2.3.1: Preparation of the appraisal (template & plan) - account for other WPs capabilities, tailored to principal stakeholder groups.

T2.3.2: Appraisal of stakeholders' RMI needs & requirements.

- i. 2-3 surveys to capture distributed stakeholders' positions (e.g. member-state geosurveys, professional geologists);
- ii. 4-6 small group meetings/interviews to elicit key stakeholders' positions in depth; and
- iii. 1 interactive multi-stakeholder workshop to identify non-apparent stakeholders' needs and requirements & joint interests (~ 30 external participants, in Brussels along with the second Consortium meeting)

T2.3.3: Data analysis and validation. The outcomes of the need & requirement appraisal will be analysed, classified and mapped. The findings will then be consolidated by the project team in a virtual meeting, and documented in a report.

- develop a stakeholder ontology (stakeholders are a moving target)
- identify niches that make sense for an RMI capacity (e.g. In relation to EGDI, JRC)
- identify stakes of potential RMI capacity users
- identify hidden stakes
- alignment of stakeholder questions with RMI capacity capabilities
- phasing of other WPs with regard to delivery of WP2

WP2 meeting: 8.00-12.00

- **Inception of stakeholders**
- **Inception of stakes**
- **Assessment of gaps and shared understanding of stakes**
- **WP2 planning: T2.2 and T2.3**
